

CASE STUDY

AMAZING RACE CHINA (Licensed from AMAZING RACE - USA)

This was a logistics nightmare as the whole show was shot in ONE DAY in 4 different locations with different props specially built at each one.

We moved 220 cast & crew around the island after bringing most of them by chartered plane from Namibia the day before. Over 45 vehicles were used.

The star moment was when the two helicopters were in action with the celebrities jumping off a cliff attached by elastic to one of them.

Stunt co-ordinators were brought in from South Africa.

All health & safety precautions were taken in liaison with the authorities.
